

Customer and Partner Community implementation

Challenge

- In need of a centralized system to globalize their services and manage all customer communications and interactions.
- Also need to build a platform for one of their government clients that would allow their users to seamlessly and efficiently communicate directly with the government. Solution

Idea

- Created a customer community that allows their commercial customers to login, amend cases, view and raise orders and give feedback.
- Community cloud helped manage business processes enabling them to expand beyond UK hub and UK hours.
- Community developed with the client, on behalf of a government client, enabled their end users to login and manage their interactions with the government.

Business Benefits

- Customers can now manage their interactions through one centralized platform.
- Enabled the company to globalize their operations.
- Because of easy communication, the records are maintained well which in turn ensures compliance with important regulations.

Client Background

- UK based Hi-tech firm providing monitoring & tracking services to the global maritime sector.
